RF and Microwave Systems
Regulatory Aspects of the RF and Microwave Spectrum in South
Africa

Drill Problem
DP1

February 19, 2008

The regulatory situation of the RF and Microwave Spectrum in South Africa has changed over the years. This evolution and the present situation is documented on the Web, in the form of government documents and newspaper articles. Prepare a four page essay summarising the historical background, and then outlining the present situation. Make sure that your document references all your source material carefully. The UCT rules on plagiarism will be strictly enforced. Your essay must be carefully presented, and you must give your opinion as to whether we have reached a satisfactory state, or, is more development of the regulatory framework needed.

Here is an idea of the structure of the essay how the marks will be assigned:

Physical breakdown (Total 10%)

- Clearly laid out
- Neat illustrations / captions
- References

Logic and development (Total 60%)

- Introduction
- Background
- Argument and facts
- Good links to references

Conclusions (Total 30%)

- Clear
- Summary of the facts
- Personal opinion / recommendations
